

Bred for rally, honed for road domination. Our success in motorsports has led to continuous testing and perfection of our core technologies to deliver you with pure power in your control.

TURBO BOXER ENGINE

Our famous Subaru Boxer engine sits lower and flatter in the engine bay than other engines. Due to this unique design it delivers less noise and vibration to the cabin, while the lowered center of gravity improves stability, cornering and traction with the road.

ACTIVE TORQUE VECTORING

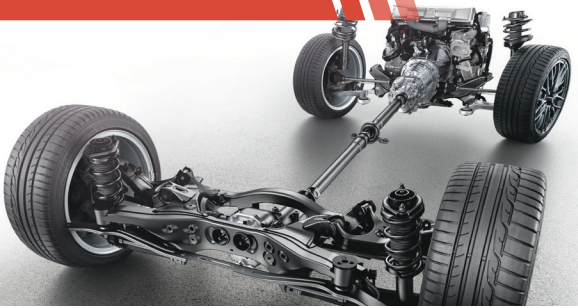

This new technology makes handling even more precise. By activating the brake on the front inner wheel while cornering, the system redistributes torque from the front inner wheel to the front outer wheel, for enhanced vehicle cornering performance limits.

SPORTS LINEARTRONIC® CVT

Paired with SI-Drive, fitted with paddle shifters and boasting two different manual modes, the highly-responsive Sports Lineartronic® available on the new WRX is a quick-shifting transmission linked to an AWD system that sends more power to the rear wheels for sportier handling.

SYMMETRICAL ALL-WHEEL DRIVE™

Symmetrical All-Wheel Drive™ delivers engine power to all four wheels simultaneously, providing increased traction and control, for twice the grip.

SPECIFICATIONS MODEL

	WRX 2.0 MT	WRX 2.0 ES CVT
Power (KW/rpm)	197@5600	197@5600
Torque (Nm/rpm)	350@2400 - 5200	350@2400 - 5200
Fuel Economy (l/100km combined)	9.2	8.6
Alloy Wheel	245/40 R18	245/40 R18

EyeSight® Driver Assist Technology is the culmination of everything Subaru engineers know about safety. Adding confidence to every trip, EyeSight monitors traffic movement, optimizes cruise control, and warns you if you sway outside your lane. The Pre-Collision Braking feature can even apply full braking force in emergency situations, helping you avoid or reduce frontal impacts.

*EyeSight only available on the WRX CVT

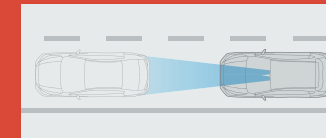

Superior Safety

The Subaru WRX is loaded with the very latest protective, preventative and predictive safety features.

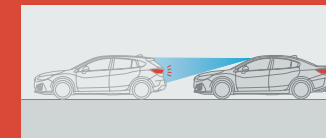

ADAPTIVE CRUISE CONTROL

Traffic doesn't always flow smoothly, so EyeSight® doesn't only keep a set speed. The system looks ahead and helps automatically adjust to keep your distance, even in stop-and-go highway traffic.

PRE-COLLISION BRAKING

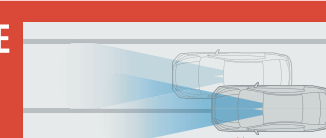

A driver ahead unexpectedly hits the brakes or cuts you off. EyeSight warns you, applies the brakes and can even help you stop your Subaru.

PRE-COLLISION THROTTLE MANAGEMENT

If you put the car in Drive instead of Reverse and EyeSight® sees an object in your path, it cuts power to help you avoid accelerating into it.

LANE DEPARTURE AND SWAY WARNING

You accidentally drift to the edge of your lane and begin to cross into another lane. EyeSight® watches for lane markers and chimes to warn you before you leave your lane.
